DR. BELLE'S TRUSS

Possible relief and there of flereis of ture. This Surject instrument is not with honors to the dicidil profession, as extensively used by unfortunate sufferers his ing under the disease of Hernia, that a pin lar account of its mechanical construction its surgical seffects is thought annecessary. The subjoined remarks from Physician Surgeona of high respectability in our constant the results of much practical experience the use and application, of this truss.

James Thatcher, M. D. author of the Mern Practice, in his second edition, under subject of Hernia, remarks PDr. Hall is clusively entitled to the credit of first adaptive true. Surgical principle for the radical contents.

clasively entitled to the credit of first adaptive true Surgical principle for the radical of Hernia. He happily conceived the idea the pad of the Truss should be so construe as simply to support the muscular fibres are the ring or aperture as much as possible, a state in which they are marginized in perheath. Unless this be attained the particle and the tendence of pressure applied. "Samuel Ackerly, M. D. in his excellent dition of Hooper's Medical Dictionary," on the head of Truss," after enumerating their soulting from the use of the defective trustruming from the use of the defective trustruming from the use of the defective trustruming from the trustruming from the trustruming from the trustruming from the subject, by his improvement in the construction of these, has rendered it certain that all recent see, has rendered it certain that all recent tures and those of children may be perman by cured, and those of old people and of standing, may, in many cases, also be re-died. The pad of Dr. Hull's Truss is conand not convex; and hence the raised cire margin, by proper adaptation, presses upon sides of the hernial opening, and tends to c the aperture and cure the hernia
